Subject: Microsoft Settlement

Gentlemen:

Enough is enough!!!! Let's get on with starting our economic engine again. Microsoft products have made our workplace a better work place. We need the inventive create ideas that drive a great economy. The savings in our factories and business offices has been tremendous!! Wake up, don't kill our economy again. While the terms of the settlement are tough, I believe they are reasonable and fair to all parties, and meet - or go beyond -- the ruling by the Court of Appeals, and represent the best opportunity for Microsoft and the industry to move forward.

Please give us in industry a break and let our economy get going again. I teach teachers, professors, and trainers from industry and government how to train at a distance using two way video, web based instruction and virtual courseware. We have gone so far, yet have so far to go to achieve the dreams of students and facility to distance learning. We need the creative talent of Microsoft working at the forefront driving our economic engine.

Please give us a break and settle the Microsoft suites.

Gerald R. McClain
